Len Saunders BS, MA
Director
Project ACES

Len has been teaching Physical Education for almost 30-years in New Jersey. He has won awards for his contribution to children's fitness at the local, state, and national level. He has been a guest speaker at State Universities, as well as state and national conventions.

Len has contributed articles to magazines such as Muscle & Fitness, as well as writing articles for Human Kinetics Publishing, the most respected publisher in the health and fitness industry. Some of Len's articles have been used for nationally syndicated television shows on television.

Sports Illustrated has called Len "high spirited", and Ladies' Home Journal says "nobody is more committed to children's fitness than Len Saunders".

Honors include: Outstanding Teacher of Physical Education-- New Jersey; Outstanding Citizen Award - Mayor's Council on Physical Fitness and Sports; Achievement Award from The President's Council Fitness, Sports & Nutrition.

What We Do: PROJECT ACES

An acronym, for All Children Exercise Simultaneously, is effectively “The World’s Largest Exercise Class”. Since 1989, the first Wednesday in May, at 10:00 AM local time, has been Project ACES Day, when millions of children, parents and teachers all over the world exercise simultaneously in a symbolic gesture of fitness and unity. It underscores the need for quality physical education in our nation’s schools. Think the “Earth Day” of Fitness meets the Exercising “Hands Across America”.

Project ACES is a community outreach program proven to be non-competitive, educational, motivational, and fun. When we first began, we had no idea that it would reach the magnitude and success of today. The program has received praise by presidents of the United States, governors, senators, and celebrities from sports and show business.

Year after year, Project ACES reaches millions of participants around the world, including all 50 United States of America and 50 other countries.

Praise and support have also come from dozens of organizations in and out of the fitness industry such as the President’s Council on Sports, Fitness & Nutrition. The Youth Fitness Coalition has collaborating partnerships with the American College of Sports Medicine’s Exercise is Medicine #EIM program and SHAPE America’s #BigFeats.

Why Do We Have PROJECT ACES?

We believe as we hope you do too, that physical fitness is preventative medicine. Surgeon General reports have continually emphasized the potentially avoidable health risks associated with a sedentary lifestyle and obesity, especially in young people. In fact, the Centers for Disease Control and Prevention (CDC) has stated that childhood obesity has reached epidemic proportions.

Exercise, physical activities, proper nutrition, active/healthy lifestyle, and adequate rest can lower the chances of developing coronary heart disease and stroke, which include risk factors such as high blood pressure and poor lipid/cholesterol blood profiles.

Research also indicates the positive role physical activity plays not only in prevention, but also treatment of diseases such as diabetes, certain cancers, osteoarthritis, and heart disease.

Mainstream media has focused on these issues repeatedly. School systems, many of which have lost funding for regular physical education classes, have begun to look at dietary interventions in the school cafeteria, as well as before or after school programs as viable alternatives.

Project ACES can fill the gaps and supplement these efforts to combat obesity and physical inactivity by making fitness fun and adaptable. Project ACES may help save lives by helping offset the obesity epidemic by teaching children early on how to make healthy, mindful lifestyle choices.

What Do the Children Do During the PROJECT ACES PARTICIPATION ASSEMBLY?

Exercise, walk, jog, dance, play games, do aerobics, self-defense, or any type of physical activity your site desires. Each site organizes its’ own Project ACES Participation Assembly for the 15-45 minutes the program usually runs.

Many sites choose to invite local politicians, celebrities and athletes to their events. The majority of schools will get their entire population outside on to a play field, put on music, and everyone has some fun by moving and exercising together. If it rains, they pump the music on the PA system, and hold activities in classrooms, halls, or in the gym. Many invite the local media to cover the event. Proclamations from the mayor and/or governor’s office may also be read.

Why Do the PROJECT ACES Programs Work?

It’s simple. The motivation for the children is to know that there are people all over the world exercising and moving along with them. Project ACES is adaptable to you and your site and it’s fun.

As a Project ACES leader you decide how big or small an event to host. Pick a theme such as physical fitness, healthy nutrition, active lifestyle or yoga-stress management. How about alternatives to alcohol, tobacco or substance abuse? Maybe a safe sex or anti-violence topic. Your call. Next, decide what special guest speaker to invite. Many sites have successfully invited mayors, governors, doctors, exercise professionals, self-defense teachers, and even sport and celebrity personalities. After the educational pep talk, it’s time for some action. It’s all geared to be fun, generate excitement, and physical activity for everyone, especially the children.

There are now PROJECT ACES CLUBS in several states that have daily, weekly, and/or monthly Project ACES Participation Assembly Programs with different health, fitness, nutrition, and lifestyle related themes yearlong. States such as New Jersey, Maine, New Mexico, and Michigan have led the way with State Coordinators. In May 2017, there were over a half million participants in the state of Michigan alone.

Become a PROJECT ACES State Coordinator.
Contact: yfcprojectaces@yahoo.com.

Be sure to sign up for yearlong PROJECT ACES CLUBS and subscribe to our newsletter. Big thank you to all the volunteers worldwide. Gratitude.
